

Free enterprise has always remained the most efficient way to separate the useful from the "NOT". I believe more and more people will be embracing the benefits of satellite radio....including the benefits of local traffic. Let the customer choose what they want. In my case, I want to pay a monthly fee to hear superior music without ads and to have the benefit of traffic updates if I chose to come from that paid service rather than having to be subjected to countless ads and as a rule very poor choice of music and content. Tell the lobbies to leave it alone...please!
